# AUTHOR INDEX VOL. 88

Beynen, A.C., see Klaasen, H.L.B.M. (88) 165
Boratynski, J., see Viljanen, P. (88) 43
Boussiba, S. and Gibson, J.
Ammonia translocation in cyanobacteria (88) 1
Buckel, W.
Unusual dehydrations in anaerobic bacteria (88) 211
Busscher, H.J., Cowan, M.M. and Van der Mei, H.C.
On the relative importance of specific and non-specific approaches to oral microbial adhesion (88) 199

Coote, J.G.
Structural and functional relationships among the RTX toxin determinants of Gram-negative bacteria (88) 137
Cowan, M.M., see Busscher, H.J. (88) 199

Driessen, A.J.M., see Konings, W.N. (88) 93

Gibson, J., see Boussiba, S. (88) 1

Harkness, R.E. and Ölschläger, T.
The biology of colicin M (88) 27

Jetten, M.S.M., Stams, A.J.M. and Zehnder, A.J.B.
Methanogenesis from acetate: a comparison of the acetate metabolism in *Methanothrix soehngenii* and *Methanosarcina* spp. (88) 181

Klaasen, H.L.B.M., Koopman, J.P., Poelma, F.G.J. and Beynen, A.C.
Intestinal, segmented, filamentous bacteria (88) 165
Koch, A.L.
The wall of bacteria serves the roles that mechano-proteins do in eukaryotes (88) 15
Kok, J., see Van de Guchte, M. (88) 73
Konings, W.N., Poolman, B. and Driessen, A.J.M.
Can the excretion of metabolites by bacteria be manipulated? (88) 93
Koopman, J.P., see Klaasen, H.L.B.M. (88) 165

Kunkee, R.E.
Some roles of malic acid in the malolactic fermentation in wine making (88) 55

Large, P.J.
Enzymes and pathways of polyamine breakdown in microorganisms (88) 249

Menon, N., see Przybyla, A.E. (88) 109
Murrell, J.C.
Genetics and molecular biology of methanotrophs (88) 233

Ölschläger, T., see Harkness, R.E. (88) 27

Peck Jr., H.D., see Przybyla, A.E. (88) 109
Poelma, F.G.J., see Klaasen, H.L.B.M. (88) 165
Poolman, B., see Konings, W.N. (88) 93
Przybyla, A.E., Robbins, J., Menon, N. and Peck Jr., H.D.
Structure–function relationships among the nickel-containing hydrogenases (88) 109

Robbins, J., see Przybyla, A.E. (88) 109

Smit, E., Van Elsas, J.D. and Van Veen, J.A.
Risks associated with the application of genetically modified microorganisms in terrestrial ecosystems (88) 263
Stams, A.J.M., see Jetten, M.S.M. (88) 181

Van de Guchte, M., Kok, J. and Venema, G.
Gene expression in *Lactococcus lactis* (88) 73
Van der Mei, H.C., see Busscher, H.J. (88) 199
Van Elsas, J.D., see Smit, E. (88) 263
Van Veen, J.A., see Smit, E. (88) 263
Venema, G., see Van de Guchte, M. (88) 73
Viljanen, P. and Boratynski, J.
The susceptibility of conjugative resistance transfer in Gram-negative bacteria to physicochemical and biochemical agents (88) 43

Zehnder, A.J.B., see Jetten, M.S.M. (88) 181

# SUBJECT INDEX VOL. 88

**Acetate**
Methanogenesis; *Methanosarcina*; *Methanothrix*; Acetyl-coenzyme A synthetase; Energetics; Carbon monoxide dehydrogenase; Methyl-coenzyme M methylreductase (Jetten, M.S.M. (88) 181)

**Acetyl-coenzyme A synthetase**
Methanogenesis; *Methanosarcina*; *Methanothrix*; Acetate; Energetics; Carbon monoxide dehydrogenase; Methyl-coenzyme M methylreductase (Jetten, M.S.M. (88) 181)

**Acetylputrescine**
Acetylspermidine; Polyamine; Putrescine; Spermidine (Large, P.J. (88) 249)

**Acetylspermidine**
Acetylputrescine; Polyamine; Putrescine; Spermidine (Large, P.J. (88) 249)

**Actin**
Prokaryote; Tubulin; Pressure; Murein cross-linking; Autolysin (Koch, A.L. (88) 15)

**Adenylate cyclase toxin**
Haemolysin; Leukotoxin; Toxin target cell specificity (Coote, J.G. (88) 137)

**Ammonia uptake**
Ammonium/methylammonium transport; Cyanobacteria (Boussiba, S. (88) 1)

**Ammonium/methylammonium transport**
Ammonia uptake; Cyanobacteria (Boussiba, S. (88) 1)

**ATP**
Lactic acid bacteria; *Leuconostoc*; Energetics; Deacidification; Malolactic enzyme; NAD (Kunkee, R.E. (88) 55)

Hydroxyacyl-CoA dehydratase; L-Serine dehydratase; Riboflavin; FAD; Iron-sulfur cluster (Buckel, W. (88) 211)

**Autolysin**
Prokaryote; Actin; Tubulin; Pressure; Murein cross-linking (Koch, A.L. (88) 15)

**Bacterial adherence**
DNA-replication; In vivo transfer; Membrane permeability; Membrane potential; Protein synthesis (Viljanen, P. (88) 43)

**Bacterial competition**
Risk assessment; Genetically modified microorganisms; Soil; Gene transfer; Biological containment; Ecosystem effects (Smit, E. (88) 263)

**Biological containment**
Risk assessment; Genetically modified microorganisms; Soil; Bacterial competition; Gene transfer; Ecosystem effects (Smit, E. (88) 263)

**Carbon monoxide dehydrogenase**
Methanogenesis; *Methanosarcina*; *Methanothrix*; Acetate; Acetyl-coenzyme A synthetase; Energetics; Methyl-coenzyme M methylreductase (Jetten, M.S.M. (88) 181)

**Cloning**
*Methylococcus capsulatus*; *Methylosinus trichosporium*; Methane monooxygenase gene; Methylotroph; Genetics (Murrell, J.C. (88) 233)

**Colicin M**
Uptake; Mode of action; Immunity (Harkness, R.E. (88) 27)

**Colonization resistance**
Gastrointestinal microbiota; Mucosa-associated bacteria; Mouse ileum; Mucosal immunity (Klaasen, H.L.B.M. (88) 165)

**Conserved sequence**
(NiFe) hydrogenase; (NiFeSe) hydrogenase; Nickel; Non-heme iron; Selenocysteine; Site-directed mutagenesis; Ligands to nickel (Przybyla, A.E. (88) 109)

**Cyanobacteria**
Ammonium/methylammonium transport; Ammonia uptake (Boussiba, S. (88) 1)

**Deacidification**
Lactic acid bacteria; *Leuconostoc*; Energetics; ATP; Malolactic enzyme; NAD (Kunkee, R.E. (88) 55)

**DNA-replication**
Bacterial adherence; In vivo transfer; Membrane permeability; Membrane potential; Protein synthesis (Viljanen, P. (88) 43)

**Ecosystem effects**
Risk assessment; Genetically modified microorganisms; Soil; Bacterial competition; Gene transfer; Biological containment (Smit, E. (88) 263)

**Electrostatic force**
Specificity; Non-specificity; Microbial adhesion; Plaque; Pellicle; Zeta potential; Surface free energy; Hydrophobicity; Shear; Van der Waals force (Busscher, H.J. (88) 199)

**Endproduct**
Membrane; Transport; Excretion; Metabolite (Konings, W.N. (88) 93)

**Energetics**
Lactic acid bacteria; *Leuconostoc*; ATP; Deacidification; Malolactic enzyme; NAD (Kunkee, R.E. (88) 55)

Methanogenesis; *Methanosarcina*; *Methanothrix*; Acetate; Acetyl-coenzyme A synthetase; Carbon monoxide dehydrogenase; Methyl-coenzyme M methylreductase (Jetten, M.S.M. (88) 181)

**Excretion**
Membrane; Transport; Metabolite; Endproduct (Konings, W.N. (88) 93)

**FAD**
Hydroxyacyl-CoA dehydratase; L-Serine dehydratase; Riboflavin; Iron-sulfur cluster; ATP (Buckel, W. (88) 211)

**Gastrointestinal microbiota**
Colonization resistance; Mucosa-associated bacteria; Mouse ileum; Mucosal immunity (Klaasen, H.L.B.M. (88) 165)

**Gene expression signal**
*Lactococcus lactis*; Heterologous gene expression; Translational coupling; Protein secretion (Van de Guchte, M. (88) 73)

**Genetically modified microorganisms**
Risk assessment; Soil; Bacterial competition; Gene transfer; Biological containment; Ecosystem effects (Smit, E. (88) 263)

**Genetics**
*Methylococcus capsulatus*; *Methylosinus trichosporium*; Methane monooxygenase gene; Cloning; Methylotroph (Murrell, J.C. (88) 233)

**Gene transfer**
Risk assessment; Genetically modified microorganisms; Soil; Bacterial competition; Biological containment; Ecosystem effects (Smit, E. (88) 263)

**Haemolysin**
Leukotoxin; Adenylate cyclase toxin; Toxin target cell specificity (Coote, J.G. (88) 137)

**Heterologous gene expression**
*Lactococcus lactis*; Gene expression signal; Translational coupling; Protein secretion (Van de Guchte, M. (88) 73)

**(NiFe) hydrogenase**
(NiFeSe) hydrogenase; Nickel; Non-heme iron; Selenocysteine; Site-directed mutagenesis; Conserved sequence; Ligands to nickel (Przybyla, A.E. (88) 109)

**(NiFeSe) hydrogenase**
(NiFe) hydrogenase; Nickel; Non-heme iron; Selenocysteine; Site-directed mutagenesis; Conserved sequence; Ligands to nickel (Przybyla, A.E. (88) 109)

**Hydrophobicity**
Specificity; Non-specificity; Microbial adhesion; Plaque; Pellicle; Zeta potential; Surface free energy; Shear; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)

**Hydroxyacyl-CoA dehydratase**
L-Serine dehydratase; Riboflavin; FAD; Iron-sulfur cluster; ATP (Buckel, W. (88) 211)

**Immunity**
Colicin M; Uptake; Mode of action (Harkness, R.E. (88) 27)

**In vivo transfer**
DNA-replication; Bacterial adherence; Membrane permeability; Membrane potential; Protein synthesis (Viljanen, P. (88) 43)

**Iron-sulfur cluster**
Hydroxyacyl-CoA dehydratase; L-Serine dehydratase; Riboflavin; FAD; ATP (Buckel, W. (88) 211)

**Lactic acid bacteria**
*Leuconostoc*; Energetics; ATP; Deacidification; Malolactic enzyme; NAD (Kunkee, R.E. (88) 55)

***Lactococcus lactis***
Gene expression signal; Heterologous gene expression; Translational coupling; Protein secretion (Van de Guchte, M. (88) 73)

***Leuconostoc***
Lactic acid bacteria; Energetics; ATP; Deacidification; Malolactic enzyme; NAD (Kunkee, R.E. (88) 55)

**Leukotoxin**
Haemolysin; Adenylate cyclase toxin; Toxin target cell specificity (Coote, J.G. (88) 137)

**Ligands to nickel**
(NiFe) hydrogenase; (NiFeSe) hydrogenase; Nickel; Non-heme iron; Selenocysteine; Site-directed mutagenesis; Conserved sequence (Przybyla, A.E. (88) 109)

**Malolactic enzyme**
Lactic acid bacteria; *Leuconostoc*; Energetics; ATP; Deacidification; NAD (Kunkee, R.E. (88) 55)

**Membrane**
Transport; Excretion; Metabolite; Endproduct (Konings, W.N. (88) 93)

**Membrane permeability**
DNA-replication; Bacterial adherence; In vivo transfer; Membrane potential; Protein synthesis (Viljanen, P. (88) 43)

**Membrane potential**
DNA-replication; Bacterial adherence; In vivo transfer; Membrane permeability; Protein synthesis (Viljanen, P. (88) 43)

**Metabolite**
Membrane; Transport; Excretion; Endproduct (Konings, W.N. (88) 93)

**Methane monooxygenase gene**
*Methylococcus capsulatus*; *Methylosinus trichosporium*; Cloning; Methylotroph; Genetics (Murrell, J.C. (88) 233)

**Methanogenesis**
*Methanosarcina*; *Methanothrix*; Acetate; Acetyl-coenzyme A synthetase; Energetics; Carbon monoxide dehydrogenase; Methyl-coenzyme M methylreductase (Jetten, M.S.M. (88) 181)

***Methanosarcina***
Methanogenesis; *Methanothrix*; Acetate; Acetyl-coenzyme A synthetase; Energetics; Carbon monoxide dehydrogenase; Methyl-coenzyme M methylreductase (Jetten, M.S.M. (88) 181)

***Methanothrix***
Methanogenesis; *Methanosarcina*; Acetate; Acetyl-coenzyme A synthetase; Energetics; Carbon monoxide dehydrogenase; Methyl-coenzyme M methylreductase (Jetten, M.S.M. (88) 181)

**Methyl-coenzyme M methylreductase**
Methanogenesis; *Methanosarcina*; *Methanothrix*; Acetate; Acetyl-coenzyme A synthetase; Energetics; Carbon monoxide dehydrogenase (Jetten, M.S.M. (88) 181)

***Methylococcus capsulatus***
*Methylosinus trichosporium*; Methane monooxygenase gene; Cloning; Methylotroph; Genetics (Murrell, J.C. (88) 233)

***Methylosinus trichosporium***
*Methylococcus capsulatus*; Methane monooxygenase gene; Cloning; Methylotroph; Genetics (Murrell, J.C. (88) 233)

**Methylotroph**
*Methylococcus capsulatus*; *Methylosinus trichosporium*; Methane monooxygenase gene; Cloning; Genetics (Murrell, J.C. (88) 233)

**Microbial adhesion**
Specificity; Non-specificity; Plaque; Pellicle; Zeta potential; Surface free energy; Hydrophobicity; Shear; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)

**Mode of action**
Colicin M; Uptake; Immunity (Harkness, R.E. (88) 27)

**Mouse ileum**
Gastrointestinal microbiota; Colonization resistance; Mucosa-associated bacteria; Mucosal immunity (Klaasen, H.L.B.M. (88) 165)

**Mucosa-associated bacteria**
Gastrointestinal microbiota; Colonization resistance; Mouse ileum; Mucosal immunity (Klaasen, H.L.B.M. (88) 165)

**Mucosal immunity**
Gastrointestinal microbiota; Colonization resistance; Mucosa-associated bacteria; Mouse ileum (Klaasen, H.L.B.M. (88) 165)

**Murein cross-linking**
Prokaryote; Actin; Tubulin; Pressure; Autolysin (Koch, A.L. (88) 15)

**NAD**
Lactic acid bacteria; *Leuconostoc*; Energetics; ATP; Deacidification; Malolactic enzyme (Kunkee, R.E. (88) 55)

**Nickel**
(NiFe) hydrogenase; (NiFeSe) hydrogenase; Non-heme iron; Selenocysteine; Site-directed mutagenesis; Conserved sequence; Ligands to nickel (Przybyla, A.E. (88) 109)

**Non-heme iron**
(NiFe) hydrogenase; (NiFeSe) hydrogenase; Nickel; Selenocysteine; Site-directed mutagenesis; Conserved sequence; Ligands to nickel (Przybyla, A.E. (88) 109)

**Non-specificity**
Specificity; Microbial adhesion; Plaque; Pellicle; Zeta potential; Surface free energy; Hydrophobicity; Shear; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)

**Pellicle**
Specificity; Non-specificity; Microbial adhesion; Plaque; Zeta potential; Surface free energy; Hydrophobicity; Shear; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)

**Plaque**
Specificity; Non-specificity; Microbial adhesion; Pellicle; Zeta potential; Surface free energy; Hydrophobicity; Shear; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)

**Polyamine**
Acetylputrescine; Acetylspermidine; Putrescine; Spermidine (Large, P.J. (88) 249)

**Pressure**
Prokaryote; Actin; Tubulin; Murein cross-linking; Autolysin (Koch, A.L. (88) 15)

**Prokaryote**
Actin; Tubulin; Pressure; Murein cross-linking; Autolysin (Koch, A.L. (88) 15)

**Protein secretion**
*Lactococcus lactis*; Gene expression signal; Heterologous gene expression; Translational coupling (Van de Guchte, M. (88) 73)

**Protein synthesis**
DNA-replication; Bacterial adherence; In vivo transfer; Membrane permeability; Membrane potential (Viljanen, P. (88) 43)

**Putrescine**
Acetylputrescine; Acetylspermidine; Polyamine; Spermidine (Large, P.J. (88) 249)

**Riboflavin**
Hydroxyacyl-CoA dehydratase; L-Serine dehydratase; FAD; Iron-sulfur cluster; ATP (Buckel, W. (88) 211)

**Risk assessment**
Genetically modified microorganisms; Soil; Bacterial competition; Gene transfer; Biological containment; Ecosystem effects (Smit, E. (88) 263)

**Selenocysteine**
(NiFe) hydrogenase; (NiFeSe) hydrogenase; Nickel; Non-heme iron; Site-directed mutagenesis; Conserved sequence; Ligands to nickel (Przybyla, A.E. (88) 109)

**L-Serine dehydratase**
Hydroxyacyl-CoA dehydratase; Riboflavin; FAD; Iron-sulfur cluster; ATP (Buckel, W. (88) 211)

**Shear**
Specificity; Non-specificity; Microbial adhesion; Plaque; Pellicle; Zeta potential; Surface free energy; Hydrophobicity; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)

**Site-directed mutagenesis**
(NiFe) hydrogenase; (NiFeSe) hydrogenase; Nickel; Non-heme iron; Selenocysteine; Conserved sequence; Ligands to nickel (Przybyla, A.E. (88) 109)

**Soil**
Risk assessment; Genetically modified microorganisms; Bacterial competition; Gene transfer; Biological containment; Ecosystem effects (Smit, E. (88) 263)

**Specificity**
Non-specificity; Microbial adhesion; Plaque; Pellicle; Zeta potential; Surface free energy; Hydrophobicity; Shear; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)

**Spermidine**
Acetylputrescine; Acetylspermidine; Polyamine; Putrescine (Large, P.J. (88) 249)

**Surface free energy**
Specificity; Non-specificity; Microbial adhesion; Plaque; Pellicle; Zeta potential; Hydrophobicity; Shear; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)

**Toxin target cell specificity**
Haemolysin; Leukotoxin; Adenylate cyclase toxin (Coote, J.G. (88) 137)

**Translational coupling**
*Lactococcus lactis*; Gene expression signal; Heterologous gene expression; Protein secretion (Van de Guchte, M. (88) 73)

**Transport**
Membrane; Excretion; Metabolite; Endproduct (Konings, W.N. (88) 93)

**Tubulin**
Prokaryote; Actin; Pressure; Murein cross-linking; Autolysin (Koch, A.L. (88) 15)

**Uptake**
Colicin M; Mode of action; Immunity (Harkness, R.E. (88) 27)

**Van der Waals force**
Specificity; Non-specificity; Microbial adhesion; Plaque; Pellicle; Zeta potential; Surface free energy; Hydrophobicity; Shear; Electrostatic force (Busscher, H.J. (88) 199)

**Zeta potential**
Specificity; Non-specificity; Microbial adhesion; Plaque; Pellicle; Surface free energy; Hydrophobicity; Shear; Van der Waals force; Electrostatic force (Busscher, H.J. (88) 199)
